

Course Formats:

Choose the look and feel of your course through formatting options:

Grid Format

Course format

Format ? Grid format

Number of sections 5

Hidden sections ? Hidden sections are shown in collapsed form

Course layout ? Show one section per page

Set the image container alignment ? Center

Set the image container width ? 210

Set the image container ratio relative ? 1:1

Grid format

Number of sections:
Choose number of required sections. This may be changed in the course as needed.

Course layout:
Choose:
1. **Show one section per page** displays one section on the page with navigation buttons; must click on breadcrumb at top of course to return to grid view
2. **Show all sections on one page** displays each section in a separate pop-window with navigation arrows or option to close window to return to grid

Multiple settings available to change color, size, and various other grid box options - default recommended

Custom images may be added to Grid boxes

Grid format Teacher Editing View

Course layout:

Regardless of layout choice:

1. **Show all sections on one page**
2. **Show one section per page**

Teacher editing view will look like window shown. Red outline delineates course material editing

The course format
only
affects student view and
access
to course materials

Two Format changes may be made here:

1. **General section** may be moved into Grid, rather than at the top of the course
2. **Custom images** maybe added to grid boxes
