

Quick List (QL): Combine Multiple VidGrid videos/recorded series, parts or segments

- Videos must be **selected** in the sequential/chronological order to be combined.
 - They cannot be rearranged without recreating combined video.
 - Recommend: Title videos parts/segments with part/segment sequence number along with content identifying title for easier combining
1. Log in to VidGrid > My Videos folder
 2. Click on 1st video > open More Options (...) menu > select Combine Videos
 - a. {Selected 1st video will be gray highlighted with a 1 over it}
 - b. {Below will be a + sign with Combine another video label below the + sign}
 3. Click the + sign
 4. Click on next video in the series > Combine Video (right corner blue)
 - a. {Selected video will now appear in gray below 1st video}
 - b. {+ Sign Combine Video Label will appear below}
 5. Repeat Process to add additional parts/segments
- When done selecting videos to be combined, editing options are again available.
 - Title of Video will be "New Combined Video" on the lower left below video screen, hover to right of title to show pencil. Click on pencil to rename new combined video to appropriate content title. Click gray checkmark to save title change. It will appear green when checked.
 - Your video is complete with the option of adding new video parts to the end of it or adding it to the end of another video using the above process.
 - To view My Videos folder, click on Videos in top right corner.
 - Note: Original video parts will remain in folder along with newly created combined video
