

Combining Multiple Videos:

If video presentation is recorded in multiple parts/segments, or recorded by multiple presenters, videos may be combined if they are saved to the same folder. Multiple presenters may create a Shared Folder where videos can be stored. This will enable multiple videos to be combined with multiple presenters.

This is your grid. From here, you can view your 10 most recent videos, and your folders.

Your folders can be accessed from this page above your recent videos, or by clicking on the arrow next to **My Grid**.

The screenshot shows the VidGrid interface. On the left is a sidebar with the Lubbock Christian University logo, a 'Record' button, a 'My Grid' button (highlighted with a red box), 'Shared with me', 'Campus Wide CONTENT...' (highlighted with an orange box), and 'Trash'. An orange arrow points from the 'Campus Wide CONTENT...' box to an annotation. The main area has a 'Search' bar, a 'My Grid' header, a 'Folders' section (highlighted with a red box) containing 'My Videos', 'New Folder 1', and 'New Folder 2', and a 'Videos' section showing three video thumbnails: a pink tulip, a field of blue flowers, and purple flowers. A red box highlights the 'Videos' section and contains a list of video actions. A blue chat bubble is in the bottom right corner.

If you do not put your videos into one of your personal folders, your recordings will go into **Campus Wide CONTENT** and will be visible for all to see and more difficult for you to locate and organize.

Videos in your grid may be:
put into personal and/or shared folders
combined: several videos or parts of presentation can be combined into one video
edited: trimmed, cloned, combined, deleted
added to: assignments, forums, other course activities
shared: copy URL, download, shared folders, embedded

- My Videos
- New Folder 1
- New Folder 2

Videos

To combine video parts/segments:

Double click on the first video to open it. This **MUST** be the first video in the presentation's chronological sequence.

Open More options:

Click on Combine videos

- Preview video
- Download
- Add to folders
- Add attachments
- Copy GIF
- Manage GIF
- Manage thumbnail
- Combine videos**
- Linked videos
- Duplicate
- Set expiration
- Move to trash

Combine videos ?

VidGrid PowerPoint	1	00:04
video	2	00:10

Combine another video

Combine video

Repeat process to add additional parts/segments

Combine video

This combined video will now be stored in the folder as well as the individual part videos

REMINDER: Videos *must* be combined in chronological sequence

The order cannot be rearranged once it is combined. The combined video would have to be deleted and the process started over.
